

PROJECT PORTFOLIO

ABOUT ME

My Name Is ZayarMoeKaung,

Studies Software Engineering Diploma in University of Yangon. Been working on freelance web projects ever since I graduated. Currently as a Full Stack Web Developer in Noshikumi - Chums Solutions Myanmar.

Developed awesome web applications using latest frameworks and technologies.

SKILL SET

Front End Development

Develop frontend UIs using HTML, CSS , SASS , Bootstrap and JS as well as JS frameworks like vue, react.

Back End Development

Develop Back End Server / APIs using Languages and frameworks like PHP, Laravel, Flask , Ruby on Rails and DBMS like MySQL , MongoDB , Dynamo DB

DevOp

Create , Configure and maintain web servers on AWS.
Take part in making CI/CD pipelines and deployment.

PROJECTS

I will show case the recent projects
in which
I'm responsible for entirely
Or Highly contributed

Otamm

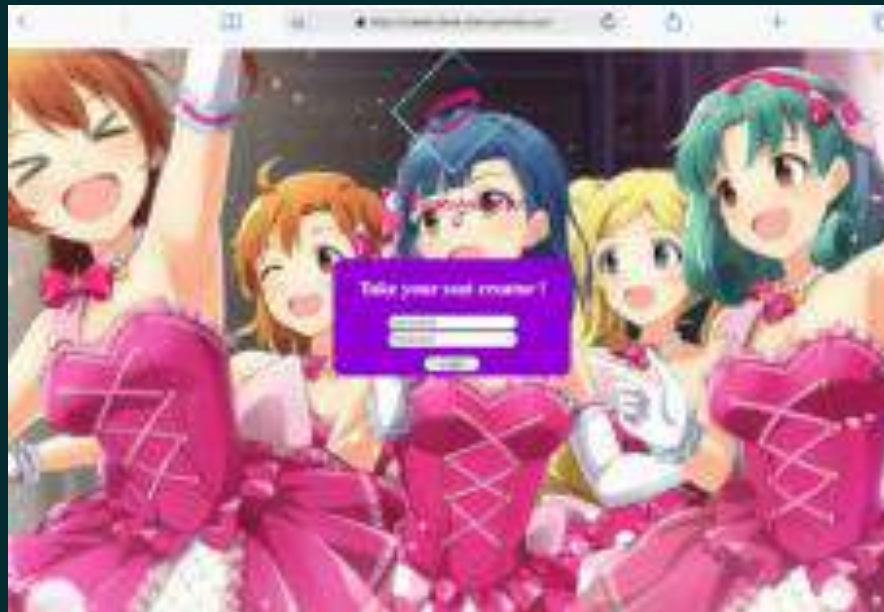

<http://www.otamyanmar.com>

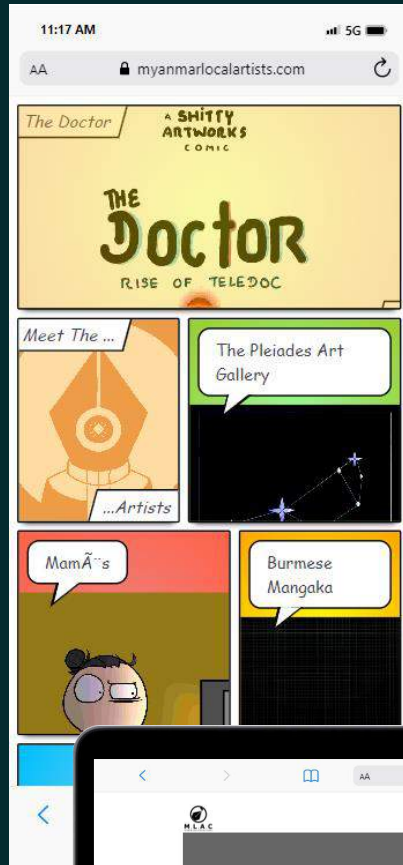

Status – developing , not published

Type - freelance project

My Contribution - Full Stack / DevOp

A fan website which will upload manga/comic/web novel reviews and articles. Developing using Laravel as backend and simple HTML , CSS, JS frontend UI for lighter and faster performance.

MLAC

www.myanmarlocalartists.com

artist.myanmarlocalartists.com

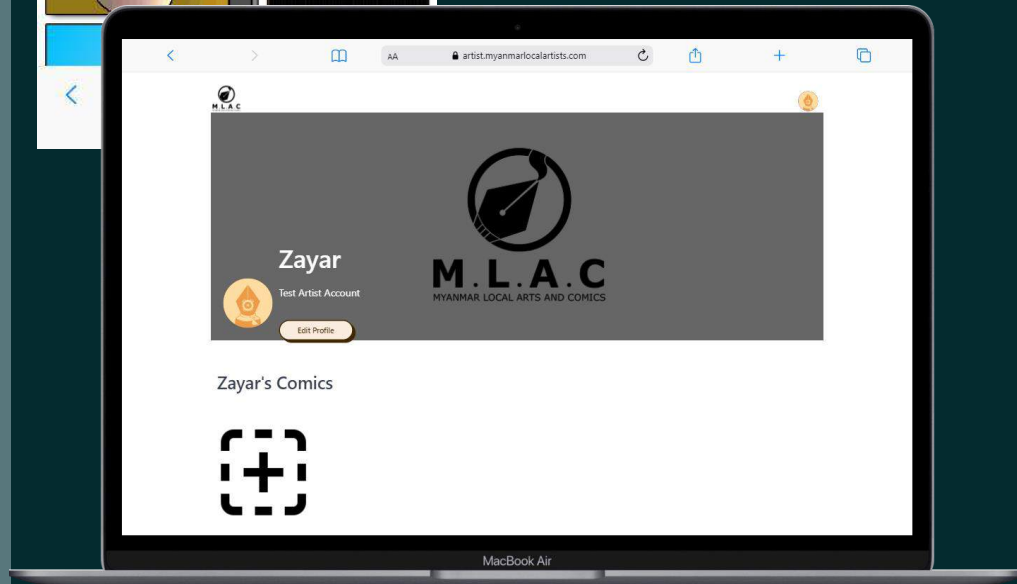

Status – published, soft launched

Type – freelance project

My Contribution – Full Stack / DevOp

Comic website developed for an artist group in Myanmar (MLAC). An aesthetic comic book UI for client side comic reader and artist website where artists can create accounts and upload their works.

Developed Using Laravel backend and HTML, CSS , JS UI.

Fujimaidai

<https://fujimidai-ah.jp>

Status

– published

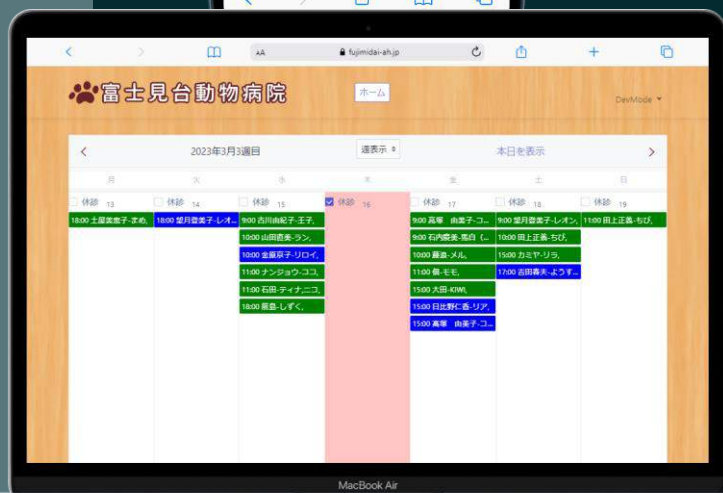

Type

- Project of Noshikumi – Chums Solutions

My Contribution

- UI for Home page ,
Booking System (client side + admin dashboard)

Website for Fujimaidai Animal Hospital in Japan. I've developed UI for WordPress home page and booking appointment system with client side web app and admin dashboard using PHP/Laravel as backend , HTML , CSS, JS and Bootstrap for UI.

Zeroney

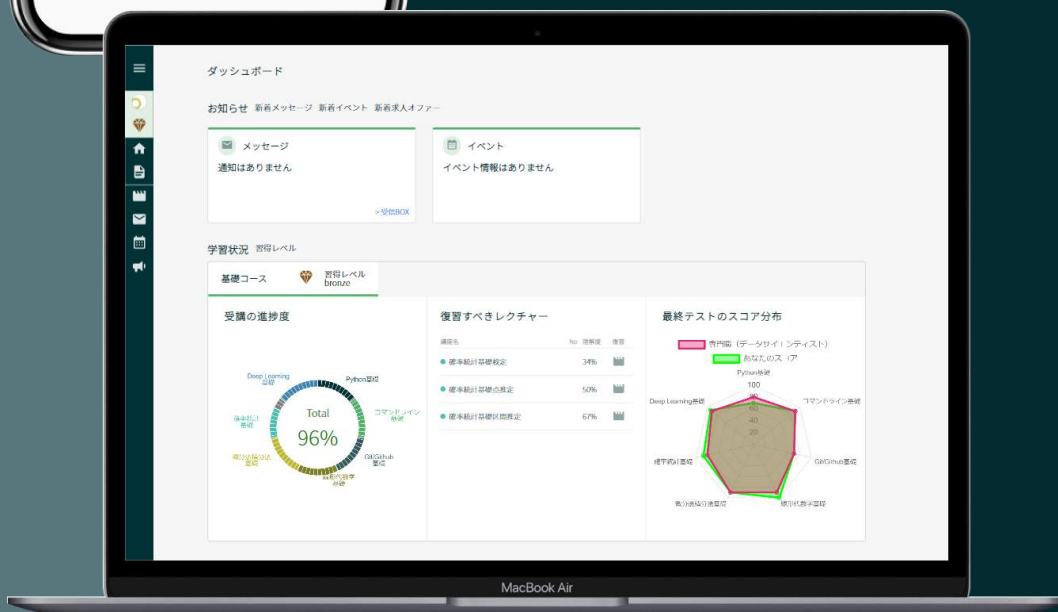

<http://datascience.zeroney.ai/>

Status – published

Type - Legacy Project of Noshikumi – Chums Solutions

My Contribution - Mobile UI

A LMS website for a Zeroney. I've developed entire mobile UI for the website as well as modify the backend methods a bit to work well with mobile UI. Develop using Ruby on Rails as backend and HTML, SCSS , JS and some JS libraries.

Uchineko

<https://uchineko.love/>

- Status – Developing , not published
- Type – Legacy Project of Noshikumi – Chums Solutions
- My Contribution – Refactoring , Implementing New Features

Japanese website for monitoring and recording pet's activities. I'm responsible for refactoring the codes to get better and faster performance also design and implement new features .

Develop using Python Flask as backend and react.js as frontend UI.
